

Oncology Departement

Clinica Veterinaria e Laboratorio d'analisi San Marco

Small Animal Oncology – Open Position

San Marco Veterinary Clinic & Laboratory is a multi-disciplinary, specialist veterinary tertiary hospital in the Northeast of Italy, close to Padova and Venice.

The center is provided with a in house worldwide recognized Laboratory and is a multidisciplinary reference center for emergency and critical care, anesthesia, dermatology, oncology, neurology, diagnostic imaging and interventional radiology, rehabilitation and physiotherapy, with hydrotherapy/swimming pool, acupuncture and pain clinic, internal medicine, surgery, radiology, dentistry, behavior, epidemiology, clinical pathology, pathology, nutrition.

With ongoing growth and success based on an outstanding reputation and a commitment to clinical excellence, San Marco is looking to recruit a board-certified oncologist to work other specialists (expert, non-board-certified surgeons may be evaluated as well). Applicants must be highly motivated, proactive and passionate about delivering clinical excellence, with excellent social and clinical skills. San Marco is an approved ECVIM-CA training centre and ECVCP (reaccreditation), ECVP, ECVD. Our staff includes board-certified vets in ECVIM-CA, ECVN, ECVA, ECVCP, ECVP, ECVD, board eligible for European College of Animal Welfare and Behavioral and European College of Veterinary Emergency and Critical Care (ECC), European College of Animal Reproduction, Ph.Ds, and other post graduate education degrees.

We strongly encourage an evidence-based multi-disciplinary approach, supporting a process of continuous learning and a collegiate atmosphere. We have an active internship program. Our extensive clinical caseload provides an interesting variety of cases and supports ongoing clinical research that is actively encouraged and supported in all specialties.

Our hospital facilities include 16 visit rooms, well designed 350 sm area for hospitalization, a dedicated ICU staffed 24 hours a day. Again, are available an in-house 3T MRI (Siemens Skyra), 384-slice dual source CT (Siemens Force), 16 slice CT (Siemens Go Now), digital radiography, 2 digital C-arm with flat panel for fluoroscopic and angiographic procedures, 10 ultrasound machines and Karl Storz endoscopic, laparoscopic/thoracoscopy and arthroscopic imaging systems.

We are planning an expansion of other 5,000 sm including radiotherapy and hybrid rooms for multimodal, mininvasive procedures.

Applications: please email your CV together with a covering letter detailing your suitability and experience to: clinica@sanmarcovet.it
